

## Edit title

 Draft **Yahyaw99** opened on Aug 19

**Yahyaw** 3 weeks ago (edited)

Edit

## Objective

- Add the authentication UI (Sign In & Sign Up) using **Shadcn UI + TailwindCSS**.

## Features Implemented

- We used **Shadcn** to have more freedom to **customize** our components and for its **AI-Ready** code.
- We used various components like **Card** components, **Button**, **Input**, **Label** ..., and customized them using **Tailwind** classes

## Sign-In Form

- Centered Card.
- Email + Password fields (with validation).
- Submit button.

## Sign-Up Form

- Authentication Options (Email, Google, Phone, Code).
- Organization related fields (name, description, email, website).
- Admin related fields (Name, Email, Password, Confirm Password).
- Validation messages (error states).

### Verification (Optional)
